## SIGNATURE MICROCURRENT FACIAL

Microcurrent face contouring is a non-invasive treatment, like a facelift without the surgery, that sends a very low electrical current to the body that tells your skin to tighten, while toning and lifting. It is an effective way to activate muscles and tighten the skin,

Microcurrent Face Treatment R850  
10 x Sessions Package R7900

## SKIN EXPERTS CHOICE FACIAL

Unsure where to start? Let the experts decide.

Inclusive of a light chemical peel. R750

## I-LIPO

i-Lipo uses a low level of visible red laser light to stimulate the body's natural processes that empty the stored fat inside fat cells. The laser light is absorbed into fat cells in the treatment area, temporarily opening pores in the cell wall to release stored fat.

The fat is collected by the lymphatic system and transported to areas of the body where it can be metabolized or 'burned' during exercise. This metabolism permanently removes the fat from the body, resulting in smaller fat cells and centimeter loss.

1 x Session R450  
10 x Sessions Package R3800

## SIGNATURE MICROCURRENT BODY

Microcurrent body contouring is a non-invasive treatment, like a facelift without the surgery, that sends a very low electrical current to the body that tells your skin to tighten, while toning and lifting. It is an effective way to activate muscles that cannot be reached with exercise.

Microcurrent Body Treatment per Area R850  
10 x Sessions Package R7900
